

# Calc 3 - Assignment #01

Note Title

9/21/2011

① Find the length of the curves:

a)  $r(t) = \langle 2 \sin(t), 5t, 2 \cos(t) \rangle, -10 \leq t \leq 10$

b)  $r(t) = \langle 2t, t^2, \frac{1}{3}t^3 \rangle, 0 \leq t \leq 1$

c)  $r(t) = \langle 12t, 8t^{3/2}, 3t^2 \rangle, 0 \leq t \leq 1$

② Suppose you start at the point  $(0, 0, 3)$

and move 5 units along the curve

$r(t) = \langle 3 \sin(t), 4t, 3 \cos(t) \rangle$  in the positive

direction. Where are you now?
